**NEW PRODUCT • NEW PRODUCT • NEW PRODUCT • NEW PRODUCT • NEW PRODUCT • NEW PRODUCT**

The M10 Aerobike uses the uniquely flexible with four way micro adjustable frame as the V900 with the unique resistance built into the frame rather than competitors plastic covers which allow sweat to site under them.

The clean flat surfaces of the M10 allow for easy cleaning and maintenance.

Belt drive has become the preferred transmission system for indoor bikes delivering reliable super smooth low maintenance service. The M10 builds on this by adding the super smooth application of a magnetic brake .

The magnetic brake removes any wear variation in braking between bikes and stops the brake down of break pads by cleaning fluids.

The resistance is applied and is consistent between bikes by central resistance knob which is uniquely built into the frame for total sweat protection.

The M10 continues Instyle drive for the perfect aerobike, delivering the smoothest ride to date.

The M10 with is gold flecked black paint makes for stylish addition to any gym but with a thoroughbred workhorse to deliver reliable service.

# NEW M10

## FEATURES

- M10 Super calibrated magnetic brake
- Belt drive to deliver the ride of your life
- Coated iron and alloy flywheel for sweat protection
- In built micro four way adjustment for perfect ride position
- Oversized stainless handlebars with easy grip PVC coating
- Brake is straight push for maximum safety
- Calibrated resistance so all bikes are equal
- 49kg to make moving a lot less effort in busy clubs
- Minimal maintenance maximum usage.

## SPECIFICATION
